Our Services

Anatomical Models

We can turn your CT/MRI image into virtual 3D model with cinematic rendering for ultra realistic visualization, the 3D model can also be 3D printed in different technology and material customized to your need.

Custom orthopedic implant solutions

With our partnership with the European bone tumor implant leader, we bring the most advanced customized implant solution to Hong Kong market. We provide one stop solution from 3D modelling, surgical guide design to 3D printed implant manufacturing.

Custom Prosthetics & Orthotics

Our software enables medical professionals to 3D scan, 3D model & 3D print orthotics through an easy-to-use digital interface on an iPad.
